Location: Bangalore, India

PROFESSIONAL SUMMARY

Software Development Engineer in Test (SDET) with 2+ years of experience in **Test Automation, Performance Engineering**, and Cloud Infrastructure. Specialized in building scalable automation frameworks in **C#** and Python, optimizing Azure pipelines workflows, and executing high-concurrency load tests using **JMeter**. Proven track record of bridging the gap between Development and QA to reduce deployment times and enhance system reliability.

TECHNICAL SKILLS

Languages: C#, Python, JavaScript (ES6+), SQL, HTML/CSS

Automation & Performance: Selenium WebDriver, Apache JMeter, Postman, MSTest, NUnit

DevOps & Cloud: Azure DevOps, CI/CD Pipelines, Azure VMs, Docker, Azure Key Vault

Development: .NET Core, React.js, Microservices, REST APIs

EXPERIENCE

SafeSend Technologies | Thomson Reuters

Feb 2023 – Present

Software Engineer - Automation & Performance (SDET)

Bangalore | Remote

- Architected a parallel processing execution framework on **Azure VMs**, reducing automation suite runtime by **25%** and optimizing cloud resource consumption.
- Designed and executed high-concurrency load tests using **Apache JMeter**, simulating 5,000+ concurrent users to benchmark API throughput and latency boundaries.
- Helped Develop a **Framework** to automate the Accuracy comparison for different **AI Models**

Graduate Engineering Trainee

- Developed a full stack web page, including back-end services C#, front-end interface in react.js and database (mssql)
- Optimized database performance through SQL query tuning and indexing, resulting in faster data retrieval for high-volume transactions.

Deloitte

May 2022 – Jul 2022

Frontend Developer Intern

Remote

- Developed a responsive React-based web application, utilizing reusable components.
- Implemented data visualization dashboards using graphing libraries to analyze real-time API data sources.

PROJECTS

Browser Startup Page | *Vanilla JS, HTML, CSS*

- Developed a minimalist task management application with persistent data storage using **IndexedDB**, ensuring offline capability.

LEARN INDEXDB | *React.js*

- Built a decoupled microservices system to improve modularity, reducing dependencies between core components by 40%.
- Implemented a responsive UI using **Chakra UI**, focusing on accessibility and user-friendly design patterns.
- Created a comprehensive blog post guide detailing the usage of **indexed DB**, offering step-by-step instructions and best practices for effective utilization.

EDUCATION

Sapthagiri College of Engineering

2019 – 2023

B.E. in Computer Science Engineering | CGPA: 7.79
